

KM PRODUCT REVIEW *M-Files*

- M-Files is from Motive Systems, a US company formerly producing software for architects and engineers M-Color. In 2005 version 1.0 of M-Files was released.
- It is more of a content management system and also helps in automating critical business flows while ensuring collaboration and security.
- Intelligent information management platform
- Helps companies make smart connections across the business

Functionalities

Our View

- Doing the right things as expected from Content management solution. Evolving into a solution that enables Hybrid working and office automation
- Not much known and focus should be on marketing the solution better
