

KM PRODUCT REVIEW Zoho Workdrive

- Zoho Corporation- Indian multinational technology company that makes Cloud-based business tools
- Zoho Work Drive: Cloud-based file storage, sync, and collaboration solution for teams of any size.
- Low-cost solutions and well-integrated products in the highly competitive content management and office suite application space

About

Provides a secure shared workspace to help teams organize and manage all their files in a single place. Key features include:

- Real-time notifications
- Document drafting
- File sharing with configurable access controls
- Smart desktop sync
- File versioning
- Analytics

Functionalities

Improvements

- While Zoho WorkDrive is a good product and good integration with other solutions of Zoho, what is missing is the collaboraton features
- Concept of content management is going beyond collaboration through drives and that should be the next big leap for Zoho WorkDrive and Zoho suite of products

Our View

- WorkDrive is very intuitive and affordable
- Confidentiality features are well evolved
- Some of the features are well thought out including versioning and editing by multiple individuals
- Zoho is fast becoming a competitor for the well-entrenched M365/O365 solutions from SharePoint
